

Charles Darwin's five year voyage on The Beagle

Charles Darwin The Beagle Voyage labels

1) 27th December 1831:
The ship sets sail from
Plymouth in England

2) CANARY ISLANDS: The ship is
unable to stop because of a Cholera
outbreak in England. Darwin is sad
that he can't land and see the islands.

3) CAPE VERDI: Darwin makes his
first important discovery when he sees
fossil sea shells halfway up a cliff
face.

4) BRAZIL: Darwin spends a
lot more time ashore,
exploring the rainforests and
collecting many important
specimens of animals,
insects and plants. He also
argues with the Captain!

5) ARGENTINA: Darwin collects a wide
range of fossils from Patagonia and the
Falkland islands and the ship is shouted at
by the people of Tierra Del Fuego.

6) SOUTH AMERICA: Darwin
finds large animal fossils which
would have needed a lot more
vegetation to live than the
current landscape. This makes
him realise that the land must
have changed over time.

7) GALAPAGOS ISLANDS: Darwin
makes his most important
discoveries because of the isolated
nature of the islands, including his
famous finch discoveries which
eventually confirm his famous
"Theory of Evolution by Natural
Selection."

adding quotes and images

Giant Ground Sloth

1. *Geospiza magnirostris*.
3. *Geospiza parvula*.

2. *Geospiza fortis*.
4. *Certhiidea olivacea*.

Charles Darwin The Beagle
Voyage – extension activity,
adding quotes and images

***"This was a great disappointment to Mr. Darwin,
who had cherished a hope of visiting the Peak of
Tenerife"***
Captain Fitzroy

***"These poor wretches were
stunted in their growth, their
hideous faces bedaubed with
white paint, their skins filthy
and greasy, their hair entangled,
their voices discordant, their
gestures violent and without
dignity."*** Charles Darwin

***"When out of temper Captain Fitzroy was utterly
unreasonable. For instance, early in the voyage at Bahia
in Brazil he defended and praised slavery, which I
abominated!"*** Charles Darwin
